

Smart luggage locker

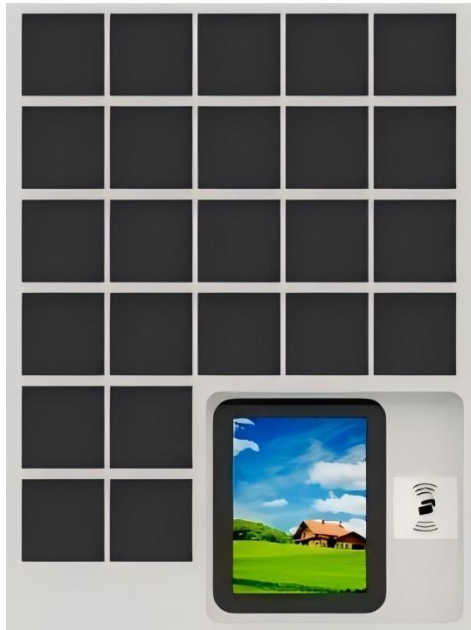

Introducing our Smart Luggage Lockers, designed for seamless convenience during your stay. Integrated with your accommodation's PMS, these lockers automatically sync with your check-in/out details for secure storage. Access your assigned locker anytime using a unique verification code sent to your mobile, ensuring contactless and hassle-free luggage management throughout your journey.

Smart Key Cabinet

The Smart Key Cabinet streamlines key management for smart-lock vacation rentals, enabling guests to securely access and return keys via self-service. Integrated with PMS systems, it updates key status in real time, ensuring instant visibility into guest interactions. Cleaning teams automatically receive room readiness alerts and immediate key access, accelerating turnover efficiency. This solution enhances operational transparency

and elevates guest satisfaction through seamless automation.

Smart lock (lock set)

This smart lock is specially designed for Japanese vacation rentals, offering a hassle-free installation that fits directly over existing traditional doorlocks. It generates unique access codes based on check-in/checkout times, enabling guests to securely enter the property without physical keys. The auto-expiring passwords ensure seamless turnover between bookings, while remote management via an app allows hosts to control access in real-time. Its compact, dual-language interface (Japanese/English) caters to international travelers, combining convenience, security, and compatibility with rental workflows.

Smart lock

A seamless access solution designed for modern vacation rentals. This intelligent door lock automatically generates unique entry codes based on reservation details, ensuring secure and contactless check-ins. Integrated with major Property Management Systems (PMS), it synchronizes guest information in real-time, eliminating manual updates. Perfect for hosts seeking automated operations, it enhances guest convenience while streamlining property management through cutting-edge technology.
